

STATEMENT OF PROGRAM GOAL  
ARCHITECTURE  
DIPLOMA PROGRAM

***PROGRAM GOAL:***

Provide high quality education and training that will enhance the student's creativity and logical capacity and enable him/her to communicate effectively, to be technically competent in architecture, to work to the highest ethical standards, to function in multi-disciplinary teams and independently, to be creative and artistic, and to produce simple architectural designs.

PROGRAM OBJECTIVES  
ARCHITECTURE  
DIPLOMA PROGRAM

The program should enable the student to:

1. Communicate effectively in English both orally and in writing in the professional setting.
2. Work individually and in a team environment.
3. Take an active role and participate in his/her career development to ensure technical competence.
4. Make use of the available computer communication resources.
5. Maintain and practice with the highest standard of codes and ethics.
6. Work on multi-disciplinary projects.
7. Accurately apply architectural principles under the supervision of professionals in a professional environment. This includes:
  - a. The use of Computer Aided Design (CAD) to produce 2D drawings.
  - b. Production of 2D and 3D manual drawings.
  - c. Interpretation of 2D drawings.
  - d. Assisting in producing professional presentations of designs.
  - e. Defending decisions.
  - f. Planning work.
8. Understand and apply the knowledge of building construction, building materials, building structures, landscaping, and history of architecture.
9. Be creative and develop artistic skills.
